

4. [13 points] Consider the following functions

x	-2	-1	0	1	2	3
$p(x)$	0	3	2	1	-4	-2

$$k(x) = x^2 - x$$

a. [6 points] Find the values of the following quantities. If any of the quantities is not defined, write “UNDEFINED”. Simplify your answers.

i) $k(-4) =$ _____

ii) $(p(2))^{-1} =$ _____

iii) $(2g(1) + 1)^2 =$ _____

iv) $g(k(2)) =$ _____

b. [2 points] Find an expression for $k(t+1)$ in terms of only the variable t . You do not need to simplify it.

$$k(t+1) = \text{_____}$$

c. [5 points] Find all the solutions to the following equations. Your answers must be exact. If an equation has no solution, write “No solution”. Show all your work.

i) $k(z) = 0$.

$$z = \text{_____}$$

ii) $p(g(t)) = -2$

$$t = \text{_____}$$
