4. [7 points] In this problem you do not *need* to show any work, but you can receive partial credit for work shown if your final answer is incorrect. Write your final answer in the space provided.

Consider the function:

$$P(r) = \frac{r(2r-1)^3}{5(2r-1)(r^2+10)(r+3)}$$

a. [3 points] Find the r-coordinate(s) of the hole(s) and the zero(s) of y = P(r). If the function has no holes or zeros, write NONE in the space provided.

r-coordinate(s) of hole(s):

$$r-coordinate(s) of zero(s):$$

b. [4 points] Find the **equations** of the vertical and horizontal asymptote(s) of y = P(r). If the function has no vertical or horizontal asymptotes, write NONE in the space provided.

Vertical asymptote(s): _____

Horizontal asymptote(s):
