2. [12 points] A continuous (but not necessarily differentiable) function, $f$, defined for all real numbers has the following properties:

- $f'(x) = 1$ for $x < -1$
- $f$ is concave up for $-1 < x < 3$
- $f(2) = 1$
- $f'(2) = 0$
- $\lim_{x \to +\infty} f(x) = 2$
- $f''(x) > 0$ for $x > 5$

On the axes below, draw a possible sketch of $y = f(x)$ including labels where appropriate.
