

- b. [5 points] After climbing the globe, Gabe jumps onto a small ferris wheel. Let $H(t)$ be his height, in inches, above the ground t seconds after Gabe jumped, where

$$H(t) = 12 + 9 \cos\left(\frac{\pi}{75}(t - 120)\right).$$

Find the the *smallest* positive value of t at which Gabe's height above the ground is 10.5 inches. Clearly show each step of your algebraic work. Give your answer in *exact* form.

Answer: $t =$ _____

3. [5 points] Let

$$B(k) = e^{-4k^2} \tan(k + 3).$$

Use the limit definition of the derivative to write an explicit expression for $B'(5)$. *Your answer should not involve the letter B. Do not attempt to evaluate or simplify the limit.* Please write your final answer in the answer box provided below.

Answer: $B'(5) =$
