2. [14 points] The table for the derivative of a function $h$ with continuous first derivative is given below. Assume that between each consecutive value of $x$, the derivative $h^{\prime}$ is either increasing or decreasing. For each statement below, indicate whether the statement is true, false, or cannot be determined from the information given. No partial credit will be given.

| $x$ | -4 | -3 | -2 | -1 | 0 | 1 | 2 | 3 | 4 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $h^{\prime}(x)$ | 2 | 3 | 1 | -3 | -4 | -2 | 0 | 2 | 1 |

a.) The function $h$ has a local maximum on the interval $-2<x<-1$.

True False Not enough information
b.) The function $h$ is negative on the interval $-1<x<1$.

True False Not enough information
c.) The function $h$ is concave up on the interval $0<x<4$.

True False Not enough information
d.) The function $h$ is decreasing on the interval $-3<x<-2$.

True False Not enough information
e.) The function $h$ has an inflection point on the interval $-1<x<1$.

True False Not enough information
f.) The derivative function, $h^{\prime}$, has a critical point at $x=2$.

True False Not enough information
g.) The second derivative function, $h^{\prime \prime}$, is positive on the interval $0<x<3$.

$$
\begin{array}{lll}
\text { True } & \text { False } & \text { Not enough information }
\end{array}
$$
