10. [8 points] Let $j(t)$ be a differentiable function with domain $(0, \infty)$ that satisfies all of the following:

- $j(5) = 0$
- $j(t)$ has exactly two critical points
- $j(t)$ has a local maximum at $t = 5$
- $j(t)$ has a local minimum at $t = 9$
- $\lim_{t \to 0^+} j(t) = -\infty$
- $\lim_{t \to \infty} j(t) = 0$

You do not need to show work in this problem.

a. [2 points] Circle all of the following intervals on which $j'(t)$ must always be negative.

$(0, 2)$ $(2, 5)$ $(5, 9)$ $(9, \infty)$

b. [3 points] Find all the values of t at which $j(t)$ attains global extrema on the interval $[1, 9]$. If not enough information is provided, write NOT ENOUGH INFO. If there are no such values of t, write NONE.

Answer: Global max(es) at $t =$ _____

Answer: Global min(s) at $t =$ _____

c. [3 points] Find all the values of t at which $j(t)$ attains global extrema on its domain. If not enough information is provided, write NOT ENOUGH INFO. If there are no such values of t, write NONE.

Answer: Global max(es) at $t =$ _____

Answer: Global min(s) at $t =$ _____
