2. [5 points] Caleb has an attic apartment, and his bedroom has a triangular wall that is 14 feet wide and 12 feet tall at its tallest point. He wants to build a rectangular bookcase to put against the wall, as shown to the right. He is trying to maximize the area of the front of the bookcase.
a. [3 points] If the bookcase has width $w$ and height $h$, write a formula relating $w$ and $h$.

b. [2 points] Using your answer from (a), find an expression for the area of the front of the bookcase in terms of the variable $h$.
3. [4 points] Suppose $g(x)=x^{2 x}$. Write an explicit expression for $g^{\prime}(5)$ using the limit definition of the derivative. Your expression should not contain the letter " $g$ ". Do not evaluate your expression.
