2. (2 points each) Next to each of the functions graphed on the left below, identify which one of the inequalities on the right below best describes the situation. Here, L is the left Riemann sum for $\int_0^6 f(x) dx$ using three equal subdivisions, and R is the right Riemann sum using three equal subdivisions. [You may find it helpful to compute L, R, and the integral for each graph.]

(e)
$$L = \int_0^6 f(x) \, dx < R$$

(f)
$$R < L < \int_0^6 f(x) \, dx$$

(g)
$$R < L = \int_0^6 f(x) dx$$

(h)
$$R < \int_0^6 f(x) \, dx < L$$

(i)
$$R = \int_0^6 f(x) \, dx < L$$
