1. [13 points] The function $P(x)$ is defined on the interval $-14 \leq x \leq 14$. The graph of $P(x)$ is shown below for $0 \leq x \leq 10$.

The function $P(x)$ has the following properties:

- it is an even function,
- the shaded region has area equal to 3,
- $P(x)$ is twice differentiable on $(9, 14)$ and $P$, $P'$, and $P''$ have the following values
