5. [7 points]
Determine whether the following improper integral converges or diverges and circle the corresponding word. **Fully justify** your answer including using **proper notation** and showing mechanics of any tests you use. You do not need to calculate the value of the integral if it converges.

\[ \int_{2}^{\infty} \frac{10 + 3 \cos(x^2)}{x^{1/2} + x^{3/2}} \, dx \]

Circle one: Converges Diverges
