12. [9 points] Three intervals are given below. In the space next to each interval, write the letter(s) corresponding to each power series (A)-(I) (below) whose interval of convergence is exactly that interval. There may be more than one answer for each interval. If there are intervals below for which none of the power series (A)-(I) converge on that interval, write "NONE" in the space next to the interval. You do **not** need to show your work.
