

7. [8 points] Roy the alpaca is designing a pool and a deck for his family. The pool has the shape of a cardioid whose equation is given by $r = 4 - 4\sin(\theta)$ where r is in meters and θ is a number between 0 and 2π . The deck will be built in the region that lies inside the circle $x^2 + y^2 = 4$ and outside the cardioid. The deck is depicted in the figure as the region enclosed by the solid lines

- a. [1 point] Write the equation for the circle $x^2 + y^2 = 4$ in polar coordinates.
- b. [2 points] Find the values of θ between 0 and 2π where the cardioid and the circle intersect
- c. [5 points] Write an expression involving integrals that gives the area of the region where the deck will be built. Do not evaluate your expression.
